CallPlease 2.0 Logs Improved Call Productivity

*Cloud-based Call Log Offers New Design, New Functionality,
Improved Performance to Make Calls Smarter*

LOS ANGELES, Calif., March 21, 2016 - CallPlease, the world's most advanced call productivity application, released version 2.0 today, delivering a comprehensive update with new features and an easier-to-read and use modern design. CallPlease tracks, manages and syncs all calls and messages across teams in real time, resulting in more focused, smarter calls.

Both the Web and mobile apps introduce a new user interface and innovative new features, making it easier and faster to add, make and manage calls and messages. Faster performance improves productivity and the user experience.

New Features

- **Shared Call Logs** – the **breakthrough** that revolutionizes how call logs are managed within offices, teams and groups. There are two types of Shared Logs:
 - **Interactive Shared Call Logs** share calls and information among a team or group, enabling more effective collaboration. Sales teams can share all customer updates and requests. A law firm's research team can share call information by case. Or stockbrokers working in partnership can improve efficiency by sharing and tracking calls.
 - **Queue Shared Call Logs** record and assign call requests to team members - a great tool for help desks, sales inquiries, service businesses, etc. A plumbing business can assign incoming requests to available employees. In a small business, service or sales requests can be identified and assigned appropriately.
- **Recurring** Calls create reminders for scheduled events, such as monthly or weekly calls, birthdays and anniversaries.
- **Tags organize calls** and messages by project, like email folders.

"CallPlease changed the way that my EA and I manage our calls. The 2.0 release keeps my calls focused and informed. It's a great productivity tool," says Kris Snyder, CEO and President of Vox Mobile.

CallPlease founder and CEO Gregg Fienberg, executive producer of HBO's "True Blood," predicts that "In the future, Shared Call Logs will become the standard by which teams manage and track calls. We do for phone calls and spoken communication what Email did for written communication. Once you try it, you won't want to live without it!"

Call Smarter with CallPlease.
